

Hi Matt

Thank you for your time last week Matt. Now that you have an idea of where the Cooks Beach community would like improvements made within the business zone including signage what is the process around implementing these proposals.

The community board are aware of our in devours and as far as I am aware fully support the implementation of these proposals.

One of the very important items I forgot to mention in our meeting and one that I haven't had an answer for yet is the implementation of disabled parking in the business area. This is a roading issue but also a community issue so who is responsible for making disabled parking available to those in need?

A meeting with yourself and members of the community board would be of great help to get everyone in the picture. Allan, could we arrange that at a time that would suit Paul and the team with Matt Lamb. It would be much appreciated.

I'm away till the 18th of July but I'm sure Allison Henry or Graeme Lomas would be happy to show everyone around if the meeting was arranged while I was away. Otherwise I look forward to catching up with everyone on my return. Thanks Matt and everyone else included in this email.

Cheers
Paul Hopkins
